

Post-QC: Data Outside 2-Sigma from Mean has been Removed

The chart displays price data using candlesticks, where green indicates an upward price movement and red indicates a downward movement. A blue line represents a moving average, smoothing out the price fluctuations. The x-axis is labeled 'Date' and has major ticks for 'Jan 2021', 'Jan 2022', and 'Jan 2023'. The y-axis represents price levels, with horizontal grid lines extending across the chart area. The price starts at a moderate level in early 2021, dips slightly, then rises steadily through 2021 and early 2022. It reaches a major peak in mid-2022, followed by a sharp decline and a subsequent recovery by early 2023.
